

**Amendments to the Specification:**

Please amend the specification as follows:

At page 3, last paragraph:

In the following description color references are made to the Royal Horticultural Society Colour Chart. The color values were determined indoors from plants growing in a greenhouse in May 2003, in Hillscheid, Germany.

At page 4, between lines 12 and 13:

Corolla:

Average diameter: 46 mm

Depth: Approximately 12 mm

Form: Double

At page 5, line 23:

Fertility/seed set: No seed set observed, ~~most probably not fertile~~

At page 6, lines 18 and 20:

Shape: Nearly round, with cordate base, with the gap between the lowest lobes mostly closed, apex with weak lobes, which are somewhat stronger than those of *Pelargonium zonale* varieties known to the inventor, but much weaker than those of most *Pelargonium peltatum* varieties known to the inventor.
